

**CLAIM STATUS****RECEIVED  
CENTRAL FAX CENTER****FEB 02 2007**

Please amend the claims as follows:

1. (Currently Amended) A method for protecting industrial materials from attack and/or destruction by insects comprising:

applying a composition comprising an insecticidally effective amount of an active Use of the compound according to of the formula (I)

its metal salts, or acid addition compounds to an industrial material for which insecticidal protection is desired as insecticide for protecting industrial materials against attack and/or destruction by insects.

2. (Currently Amended) The method Use according to Claim 1, characterized in that wherein the industrial materials comprise that are protected are wood, wood composites, timber products and/or plastics.

3. (Currently Amended) A composition Compositions for protecting industrial materials from attack and/or destruction by insects, comprising: which compositions comprise an insecticidally active compound according to formula (I):

~~according to Claim 1 or its metal salts, and/or acid addition compounds thereof and at least one of a solvent and/or a diluent and also, if appropriate, processing auxiliaries.~~

4. (Cancelled)
5. (Currently Amended) The composition ~~Compositions~~ according to at least one of Claims ~~Claim 3 and 4~~, characterized in that they comprise at least one ~~further active compound~~ further comprising an additional compound comprising from the group of the fungicides and/or insecticides.
6. (Currently Amended) The composition of Claim 3 wherein ~~Compositions according to at least one of Claims 3 to 5, characterized in that they comprise, as biocidally active compound, the insecticidal compound according to formula I is present in the composition in an amount ranging from~~ ~~from 0.00001 to 20% by weight of at least one insecticide, the insecticide consisting of 50 to 100% by weight based on the weight of the composition.~~ of the active compound of the formula (I).
- 7.-9. (Cancelled)
10. (New) The method according to Claim 1 wherein formula 1 is applied to the industrial material in an amount such that the industrial material comprises the active compound in an amount ranging from 0.00001 to 20 percent by weight based on the weight of the industrial material to be protected.
11. (New) The method of Claim 10 wherein the amount of formula 1 is applied to the industrial material in an amount such that the industrial material comprises the active compound in an amount ranging from 0.0005 to 0.1 percent by weight based on the weight of the industrial material to be protected.
12. (New) The method of Claim 1 wherein the amount of formula I present in the composition ranges from 50 to 100 percent by weight based on the total weight of the composition.

13. (New) An industrial material comprising an insecticidal composition comprising an insecticidally active compound according to formula (I):

it's metal salts, and/or acid addition compounds.

14. (New) The material of Claim 13 wherein the industrial material comprises wood, wood composites, timber products, and/or plastics.
15. (New) The material of Claim 13 comprising from 0.00001 to 20 percent by weight of the insecticidally active compound based on the weight of the industrial material.
16. (New) The material of Claim 13 wherein the amount of formula I present in the composition ranges from 50 to 100 percent by weight based on the total weight of the composition.
17. (New) The material of Claim 13 wherein the composition comprises one or more additional compounds comprising a fungicide and/or an insecticide.
18. (New) The method of Claim 1 wherein the composition further comprises additional compounds comprising fungicides and/or insecticides.
19. (New) The method of claim 18 wherein the composition comprises a compound according to formula (I) in an amount ranging from 50 to 100 percent by weight based on the total weight of the composition.
20. (New) The method of claim 1 wherein the composition further comprises a solvent and/or diluent.
